

Quarter 3 Instructional Program Changes

[Arabic Version](#) | [Spanish Version](#)

As we prepare for Quarter 3, your school is making the following changes to better support your student(s).

Daily Attendance and Participation

At Level 2 at IDEA Center, students either come to campus twice a week or have full distance learning. To reinforce the idea that school happens every day, teachers will now track roll and participation each day. Students are expected to interact with the curriculum for each class every day. Individual teachers will communicate with students on how they will be marking participation. Students and parents will have access to the attendance tab in the Student and Parent Portal in Infinite Campus starting on January 18.

We have also activated a feature in the Student Campus Portal where students can check-in with their teachers each day. Teachers may request students to complete this task each day. Directions on how to do this will be shared with students.

Mandatory Live Zooms

To complement the Daily Attendance and Participation change, teachers may now require students to attend live Zoom meetings either during, before, or after the regularly scheduled class period each day or on specific days. This applies to both distance-only and on-campus students. Teachers will provide live Zoom expectations and anticipated schedules when the new quarter starts. Additionally, teachers may award points for activities completed during these virtual class sessions.
